DO A SOIL TEST 2-4 MONTHS PRIOR. START DATES BETWEEN MAY 1st AND JULY 15th.

• Mow existing lawn as low as possible without damaging lawn mower blades, bagging clippings or raking lawn to remove debris.
• Spray a non-selective, glyphosate-based herbicide such as Roundup QuikPRO at a rate of 1.5 oz/gal./1,000 sq. ft.

WEEK 1

WEEK 2

• Power rake/dethatch entire area at a depth of 1/8 in. to 1/4 in.
• Mix 3 parts Turface or Earthworks Myco 3-3-3 to 1 part Futura or Riviera + 15-30-15/7500 sq. ft.

WEEK 3

• Keep seed thoroughly moist until germination (14-21 days)
• Do not allow seed to dry out.
• Might need fungicide/dampening off for non-treated seed.

WATERING

• Apply Replenish 8-2-2 at a rate of 1/2 lb. of Nitrogen per 1,000 sq. ft.

WEEK 6

• Apply Replenish 8-2-2 at a rate of 1/2 lb. of Nitrogen per 1,000 sq. ft.

WEEK 10

• Apply Replenish 5-4-5 at a rate of 1/2 lb. of per 1,000 sq. ft. no later than August 15th.

for the do-it-yourselfer

WARM SEASON TURFGRASS

BERMUDA GRASS
ZOYSIA GRASS
## Warm Season Turfgrass

### Trees, Shrubs, Gardens

**February/March**
- Cut back any dead foliage from perennials.
- Fertilize pansies and violets with EARTHWORKS 5-4-5.
- Dormant prune any trees and shrubs if necessary.
- Plant cool-season vegetables.

**April/May**
- Apply fresh mulch to all ornamental beds along with a pre-emergent herbicide and tree and shrub fertilizer.
- Plant summer annuals, vegetables and herbs.

**June**
- Water trees, shrubs, flower and vegetable gardens as needed.
- Fertilize flowers and vegetables with OrganicPLUS.

**July/August**
- Clean out vegetable gardens and plant cool-season vegetables.
- Mulch downed leaves into the turf with mulching mower.

**September/October**
- Water vegetable gardens and flower pots as needed.
- Fertilize vegetable gardens with OrganicPLUS Veggie, Herb and Tomato Food.

### Bermuda Grass

**February 15th – March 1st**
- For winter weed control use Round-Up herbicide.

**March 15th – April 1st**
